## Read the Story

4 UFOs are unidentified flying  
 10 objects. They are strange lights or  
 18 things. They can be seen in the sky  
 25 or near the ground. No one knows  
 31 what makes the lights or objects.

37 There are people who think UFOs  
 42 may be from other planets.

48 People who have seen UFOs think  
 54 they look like saucers. They say  
 60 UFOs move at high speeds. They  
 67 say that they make a high sound.  
 74 Some UFOs have left marks on the  
 75 ground.

75 People who study them say that

81 UFOs are not from other planets.  
 87 They think that UFOs are meteors,  
 93 planets, stars, or balloons. Planes  
 98 can leave fumes in the air that look  
 106 like UFOs. But **experts** are not able  
 113 to tell us the cause of all the UFOs  
 122 that have been seen.

126 We do not need to be afraid of  
 134 UFOs. Many people say they have  
 140 seen them. Some claim to have been  
 147 inside of them. But no one has ever  
 155 been hurt by one.  
 159
